

THE WORLD'S FIRST

MANAGED SECURITY AS A SUBSCRIPTION

We bundle cybersecurity experts, automated processes, and AI technologies providing holistic security at an affordable price.

SECURE  TRUST

Holistic Managed Security

Powered By Helios

The SecureTrust solution is powered by **Helios**, an AI-driven platform that empowers a team of experts to provide efficient and effective security services.

It is **the world's first managed security subscription** powered by experts, cutting-edge AI, and automation.

This solution is designed to cater to the needs of both small businesses and enterprises, providing an all-inclusive approach that integrates and automates security measures.

Comprehensive Coverage

Get consistent protection from both known and emerging threats.

We provide real-time monitoring and threat detection, while automatic patching keeps software and systems up-to-date with the latest security updates.

Streamlined Operations

Leverage SecureTrust's experts to monitor and manage your network security and patch management from a single, centralized platform.

This can lead to more efficient administration and better overall security outcomes.

KEY BENEFITS

Quick & easy setup:

Send us a list of users and we deploy a single agent. That's it.

Fully managed:

Our turnkey solution takes < 10 minutes to set up. All you do is sign in & you're secure.

Get secure in 48 hours:

We build out your platform, providing immediate value.

End-to-end advisory support:

We include vCISO support and policies so you can meet your compliance requirements.

One stop security shop:

Spend more time growing your business and less managing vendor relationships.

DoD trained experts:

We adopt the highest levels of security standards set forth by the DoD.

Monthly subscription:

A subscription model with predictable pricing & no capex.

Helios

SECURITY POWERED BY AI

Resource Optimization

Offload some (or all) of your security responsibilities, freeing up internal IT resources to focus on other critical tasks and projects, rather than spending significant time on manual patching and network security management.

Cost-Effectiveness

Gain a more cost-effective solution over traditional security infrastructure.

By paying a subscription fee for these services, organizations can shift from a CapEx model to an OpEx model, making it easier to budget for security expenses.

Continuous Compliance

Remain compliant with relevant regulations and industry standards with a holistic and turnkey solution.

Regular updates provided by both services help maintain security and compliance levels, reducing the risk of non-compliance penalties and reputational damage.

Enhanced Scalability

As organizations grow and evolve, their security needs will also change.

Our combined solution can be easily scaled up or down, allowing businesses to adapt their security resources to meet their needs without investing in additional hardware or infrastructure.

ABOUT SECURETRUST

SecureTrust is the world's first managed security subscription powered by experts, cutting-edge AI, and automation.

Helios represents our cutting-edge platform and AI technology that empower our team of experts to provide efficient and effective security services through a subscription model.

"Advance Your Cybersecurity" Is our call to action for businesses to take their cybersecurity seriously and adopt cutting-edge solutions to protect their assets against an ever-increasing threat landscape.

Helios is the best defense against cyber threats and involves continuous monitoring, threat detection, and incident response.

By leveraging cutting-edge solutions, managed integration, and automation, businesses can stay ahead of the game and protect themselves against the latest cyber threats.
